

ABSTRACT

Method and System for Multiple-Party, Electronic Mail Receipts

- 5      An example of a solution provided here comprises: receiving a message from a sender; providing the message to a recipient; and in response to a request from the sender, automatically transmitting multiple-party receipt notifications to a number of persons. Thus a number of persons may be notified that the recipient has been provided with the content of the message. In some cases, such a solution may comprise providing limits for the multiple-party receipt notifications.
